Each time I shop at your stores, I am shocked by the amount of plastic used, especially the single use type. Plastics are cheap and versatile, but they are bad for the environment and future generations.

The reasons I am concerned are:

---

---

---

---

---

Please reduce the amount of plastics in your packaging and operations and encourage your suppliers to do the same. There are many other environmentally friendly alternatives.

I tend to shop at stores that are environmentally and sustainably inclined. I like your store and want to let you know how I think you could improve.

Sincerely,

City:
